

S conference table

**Engineered simplicity.
Now, at scale.**

Conference rooms and the tables around which we gather are changing. They have become a gathering place for collaboration, from informal to formal, small to large groups. S conference table offers Okamura's incomparable attention to detail and engineering-forward design, at a size appropriate for smaller conference rooms and offices.

OKAMURA

A beautiful shape is the best function.

Table top is 30mm thick. Inspired by the slenderness of a brushstroke, the surface is complemented by an elegantly designed frame that guarantees both stability and maximum leg room. Clear lines, and a lightness that makes the table appear longer, thinner, linear and narrow.

Technology, hidden but fully powered.

S conference table's rectangular and square tables have flush-mounted metal hatches that are available in various finishes such as veneer, laminate, and Corian®. At the bottom of one leg of each table is an inconspicuous access aperture for connecting the electrical and data systems to the floor outlet. The flexible leg attachment design allows minimizing the length of exposed wiring and cable.

Exquisite finishes

Building upon the elegant profile of X-V conference table, S conference table comes in a variety of rectangular and round top sizes with a range of carefully curated finish options including, glass, Corian®, wood veneer and laminate. The original table's diagonal wood sawhorse bases inspire the new tables' sleek diagonal legs that are available in painted or anodized aluminum.

Corian® is a DuPont Registered trademark.

Design Studio

S conference table is designed in collaboration with Rainlight — a product design studio Located in London and Los Angeles, with client collaborations across North America, Europe, and Asia.
