

VINO's playful forms enable the creation of individual interiors in lounge areas. The idea behind the forms of the VINO modules is the ergonomic requirement of people with different sizes. The variable depth of the seat ensures highest comfort to every person, no matter of what size. VINO furniture gives a warm breath to a space thanks to its wooden frame. The standard wood materials are oak and ash. The finished details of the wooden frame give a sophisticated and light look to a lounge area. The full and clearly shaped upholstery parts call for sitting. VINO is a perfect choice for lounges.

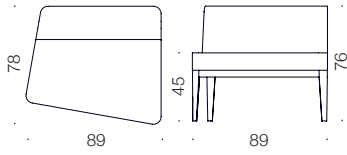

VINO is available in three asymmetric forms and additionally a corner piece. Each form has a seating with or without back rest and a table. The upholstery fabric can be chosen according to the complete interior plan. The seating modules and table have oak and ash as standard material. From request, the VINO modules can be equipped with linking device. You can strengthen the expression with VINO and use different tones in each module, or even in one module. Only the imagination gives you limits.
